

## Gift cards for kids and families

- A cancer diagnosis has an enormous economic impact on the family and the Gift Card Program is one of the many supportive care functions of the Kids Cancer Foundation.
- Gift cards make a noticeable impact by helping to provide basic necessities, enabling the families to purchase, food, clothing and gas/transportation to and from treatment; as well as provide emergency funds.

## Family Socials Program

- These programs invite patients and families to fun and entertaining events outside of the hospital setting, free of charge.
- Families have the opportunity to socialize and network with other patients and families experiencing a cancer diagnosis.
- Families have the opportunity to connect and bond with one another and to support each other during this difficult time in their lives.
- Socials are all about fun; however, there is a therapeutic benefit to those who choose to participate.

## Playmobile Portable Playroom

- These colorful carts are located both at the hospital and the Kids Cancer Center. They are stocked by the Kids Cancer Foundation with video games, toys, board games, books and arts and crafts.
- The carts are portable so they can be taken into the out-patient treatment area and into hospital rooms of patients that are either too sick to go out of their rooms or are in isolation.
